EDUCATION

Toronto Metropolitan University

Toronto, Canada

Bachelor of Science in Computer Science (Hons)

Sep. 2022 – Apr. 2025

- Relevant Coursework: Artificial Intelligence, Database Systems, Data Structures & Algorithms, Machine Learning, Web Systems Development, Software Engineering

EXPERIENCE

Starbucks

Mar. 2023 – Nov. 2024

Team Member

Toronto, ON

- Collaborated with multi-disciplinary team, and trained **5+** new hires in operations to best practices, that enhanced team performance.

TEMA Foundation

May. 2019 – Aug. 2021

Team Leader

Ankara, TR

- Led a team of **15+** volunteers, organizing **10+** community events, and coordinated logistics that resulted in the reforestation of over **500** trees and the restoration of **3** natural habitats.

PROJECTS

Brain Tumor Segmentation | *Python*

Dec. 2024

- Developed a U-Net model for brain tumor segmentation, achieving a Dice Coefficient of **0.91** and an F1-score of **0.89**, showcased in deep learning, computer vision, and medical imaging.
- Processed over **1,000** MRI images with techniques such as resizing **256x256**, normalization, and data augmentation to enhance model generalization, achieved a Jaccard Index of **0.87** and precision of **0.90** on test data.
- Automated an end-to-end machine learning pipeline for segmentation mask generation, evaluation, and visualization, incorporating tools such **TensorFlow**, **OpenCV**, and **Scikit-learn** to streamline model deployment and interpretation.

Database for Shoppers Drug Mart | *SQL, Python, Bash*

Nov. 2024

- Designed a Point of Sale (POS) database system for Shoppers Drug Mart using **SQL** and **Python**, with **6+** relational tables supporting core functionalities like transaction recording, inventory updates, and customer loyalty point tracking.
- Implemented advanced queries and normalization techniques (BCNF/3NF) to manage inventory, track employee transactions, and maintain customer profiles, ensuring **100%** data integrity and optimized performance.

ChatGPT Survey | *Python*

Sep. 2023

- Constructed a survey via **Python**, utilizing **Pandas** and **Matplotlib** to analyze and visualize survey data from **500+** responses, creating interactive charts (e.g., bar graphs, pie charts) to present insights on demographics, user preferences, and AI adoption trends. Automated analysis of CSV files, improving efficiency by **30%** in data processing workflows.
- Designed modular functions for reusable data visualizations, including methods for vertical and horizontal bar graphs, pie charts, and custom annotations. Enhanced readability and decision-making by optimizing graphical presentation and automating **10+** visualizations tailored for diverse data sets.

Audio App Simulator | *Java*

Apr. 2023

- Developed a text-based music store application in **Java**, enabling users to browse and manage a library of **100+** songs, audiobooks, and podcasts, with features like genre categorization, artist retrieval, and transaction processing. Supported **50+** search and playback operations through a streamlined interface.
- Applied **object-oriented programming** (OOP) principles (encapsulation, inheritance, polymorphism) to design a modular codebase. Utilized HashMaps, Collections, and interfaces to optimize data handling, improving processing efficiency by **40%** and ensuring seamless management of up to **1000+** items in the database.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript, HTML/CSS, Bash

Frameworks: React, Node.js, JUnit

Developer Tools: Git, Docker, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse, Linux/UNIX, Emacs
